

EMPOWERING A SECURE, EFFICIENT, AND INNOVATIVE FUTURE FOR OUR NATION'S MOST CRITICAL MISSIONS

WILDFLOWER CAPABILITIES STATEMENT

Wildflower delivers practical technology solutions for federal missions where security, speed, accountability, and execution matter. From secure AI and data infrastructure to client and edge deployment, secure communications, situational awareness, mission robotics, payload integration, logistics, and sustainment, we connect the right technologies, partners, controls, and delivery discipline to help agencies move from requirement to operational capability.

WHAT WE DELIVER:

Secure AI & Data Infrastructure

- AI-ready compute, storage, and networking
- High-performance data center architectures
- Classified and unclassified solution support
- Secure storage modernization

Enterprise AI & Decision Platforms

- Data integration and operational analytics
- Enterprise AI platform enablement
- Predictive maintenance, logistics, and mission use cases
- Governance and adoption support

Secure Client & Lifecycle Deployment

- Endpoint, client, and system configuration
- Staging, imaging, kitting, and secure deployment support
- Autopilot enrollment, asset capture, and customer reporting
- Edge device, and mission kit integration
- Secure supply chain and Albuquerque integration hub

Secure Communications & Situational Awareness

- Secure VTC, collaboration, and command-center environments
- Radio, tower, antenna, and public-safety communications infrastructure
- Deployable LTE/5G, private wireless, and drone-enabled connectivity
- Video, access control, and sensor-based awareness systems
- Interoperable, cyber-aware solutions designed for mission continuity

Mission Robotics & Payload Integration

- Robotic platform and payload integration
- Sensors, cameras, and communications
- Remote inspection, perimeter monitoring, and situational awareness
- Field deployment, and training

QUALIFICATIONS & CERTIFICATIONS:

- ISO 9001:2015 Certified Quality Management System
- HUBZone Small Business
- Woman-Owned Small Business (WOSB)
- DCAA Compliant
- CMMC Level 1 Self-Assessment Completed
- CMMC Level 2 Readiness Activities Underway
- NIST SP 800-171 / DFARS Cybersecurity Alignment
- CUI Enclave Strategy for Future Level 2 Requirements
- PMI-Certified Project Management Professionals
- Dell Technologies Federal Platinum Partner
- Juniper Federal Elite Partner
- NVIDIA Elite Partner
- Dragos Silver Partner
- Ghost Robotics Platform Sourcing & Integration
- OEM-Certified Engineering Resources

ORGANIZATIONAL STRENGTHS:

- 30+ year track record of successful performance across federal agencies and national laboratories.
- Secure supply chain and customer-specific fulfillment
- Oracle NetSuite integration for operational visibility
- Compliance, reporting, and program delivery discipline
- Credentials for strict security environments
- Small-business agility with enterprise-scale partners

CONTRACT VEHICLES:

- | | |
|-----------------|---------------------|
| • Army ITES-4H | • DOE-Motorola-ICPT |
| • SEWP VI | • GSA |
| • DOE-DELL-IDIQ | • NASA-DELL-BPA |

KEY SUCCESSSES:

- DOE AI cluster with classified network architecture
- FEMA NRCC VTC: Nationwide, seamless, secure crisis communications and coordination
- 2023 DOE HUBZone Company of the Year
- 10-year Civilian partnership delivering hundreds of millions in just-in-time orders
